

SERVICES

Aaron Industries Corp. offer our customers the most complete compounding facility. Our many proprietary compounds include Aaroprene® styrenic, and olefinic thermoplastic elastomers, Aarolene® reprocessed polystyrene, polypropylene, and polyethylene compounds, toll compounding, custom colored resins, and a complete line of filled resins.

We have invested in research and development to control and continually improve resin performance while new compounds are developed according to specific customer requirements.

EXTRUDING a variety of thermoplastics to customer specifications, with packaging available in bulk, bags and gaylords. We will certify material to your standards through our lab. Toll processing and repelletizing services available upon customers request.

GRINDING of parts, chunks, sprues, runners while offering the service of color segregation, and some contaminant removal.

POST BLENDING of color concentrates and ingredients with our horizontal and vertical blending capacity, Aaron Industries can blend virgin resin with color concentrate, and certify the blend with color chips, melt index and Izod Impact tests.

TRUCKING – Pick up and deliveries available through Aaron's trafficking department.
